1 General Topics

The FWB Filter Driver Installation Package is available for Windows XP SP2 and Windows XP SP3.

It is required to support the REGISTRY READONLY function

The following Spectrum Analyzer Firmware version are required:

R&S FSP	V4.50 SP2 or newer
R&S FSU	V4.61 SP1 or newer
R&S FSQ	V4.65 SP1 or newer
R&S FSG	V4.69 SP1 or newer

This package is already installed on instruments shipped with the versions above.

Please refer to the Analyzer's Release Notes and/or Manuals for more details concerning REGISTRY READONLY (softkey SETUP – GENERAL SETUP – NEXT).

2 Installation of the Driver Package

Copy the installer MSI file onto a USB stick

Connect mouse/keyboard to the analyzer

Switch the instrument on

Terminate analyzer application with ALT F4

Start windows Explorer, select the USB drive and double click the MSI file.

The installer will automatically reboot, open a DOS box and create an internal file list. This will required several minutes. Reboot the instrument after completion of the installation.

3 Hints

Whenever Windows XP is restored with "ANALYZER BACKUP" it is required to reinstall the FBWF Installation package.
